OCR in 1 line of code

IronOCR is unique in its ability to automatically detect and read text from imperfectly scanned images and PDF documents. The `IronTesseract` Class provides the simplest API.

Try Other code samples to gain fine-grained control of your C# OCR operations.

IronOCR provides the most advanced build of Tesseract known anywhere, on any platform. With increased speed, accuracy and a native DLL and API.

Supports Tesseract 3, Tesseract 4 and Tesseract 5 for .Net Framework, Standard, Core, Xamarin and Mono.
